

Dimension Works joins Ultimaker's Initiative to Enable Hospitals in Marion County with 3D Printing Support During Coronavirus Outbreak

As our Ocala community faces the COVID-19 pandemic, a local company, Dimension Works, is joining forces in a global network of 3D printing hubs, experts, and designers to help hospitals in short supply easily 3D print these tools and materials. Through this global initiative by Ultimaker, the global leader in desktop 3D printing, hospitals can now learn the location of available 3D printing hubs and Dimension Works has offered up their services in the Marion County metro area.

"We believe 3D printing can play an important role in sustaining the efforts of our local hospital workers during this emergency. We here to help accelerate the availability of lifesaving tools."
Mindy Beegle

Ultimaker, with the help of their local 3D printing hubs like Dimension Works, launched two initiatives to help hospitals in these unprecedented circumstances to quickly replace parts and tools that are in short supply with the help of 3D printing:

- **Print Support:** Ultimaker has created a global network of 3D printing hubs, including Dimension Works, directly available to hospitals to assist in printing parts locally
- **Design Support:** Ultimaker and Dimension Works' designers are available to help healthcare professionals design medical supplies that can be printed and sent to the hospital as soon as possible

If you are a medical professional in the Marion County area and could benefit from these services, please learn more at www.ultimaker.com.

Dimension Works is a full-service partner for 3D printing equipment, 3D software and 3D printed parts based in Ocala, Florida. We leverage our 30+ years in manufacturing, product development and design to help companies implement additive manufacturing solutions in product development and manufacturing
